RUSHIKESH KAKUSTE

IAM Engineer | SailPoint IGA Specialist | Identity Lifecycle Orchestration (JML)

Pune, India | +91 95183 18096 | iamrushi@zohomail.in | LinkedIn

PROFESSIONAL SUMMARY

Results-oriented Senior IAM / IGA Systems Engineer with 8+ years of enterprise IT experience, featuring 5+ years dedicated to Identity & Access Management (IAM), Identity Governance & Administration (IGA), and directory services, and SailPoint administration. Proven expertise in orchestrating end-to-end Joiner-Mover-Leaver (JML) lifecycles, automating birthright provisioning, and enforcing Role-Based and Attribute-Based Access Control (RBAC/ABAC) policies across hybrid enterprise environments. Proficient in target application onboarding, schema attribute mapping, account correlation, Identity Cube administration, and standard connectors (AD, LDAP, SCIM, Delimited/CSV). Demonstrated success leading User Access Reviews (UAR), Segregation of Duties (SoD) enforcement, and compliance attestations (SOX, SOC 2, ITGC). Skilled in platform incident remediation, Root Cause Analysis (RCA), and building Power BI governance dashboards to monitor access sprawl and campaign velocity.

TECHNICAL SKILLS & CORE COMPETENCIES

- **IGA & Identity Platforms:** SailPoint (IdentityIQ / IdentityNow), RSA Aveksa, Microsoft Entra ID (Azure AD), Active Directory (AD DS)
- **Lifecycle Orchestration (JML):** User Provisioning, Deprovisioning, Birthright Access, Identity Cubes, Identity Aggregation, Account Correlation, Identity Reconciliation, JIT Principles
- **Access Governance & Compliance:** RBAC, ABAC, Role Mining, Role Mapping, Least Privilege (PoLP), Segregation of Duties (SoD), Toxic Combinations, UAR / Access Certifications, SOX, SOC 2, ITGC Audit Readiness
- **Directory & Federation:** Active Directory (OUs, Groups, GPOs), LDAP, MIM, Single Sign-On (SSO), SAML 2.0, OAuth 2.0, Multi-Factor Authentication (MFA), RSA SecurID
- **Application Onboarding:** Schema Attribute Mapping, Connector Configurations (Active Directory, LDAP, Delimited Flat File/CSV, SCIM), Provisioning Policies, Correlation & Aggregation Rules
- **Operations, Analytics & Tools:** ServiceNow (Incident/Change/SLA Management), Root Cause Analysis (RCA), Power BI (IAM Metric Tracking & Certification Dashboards), Advanced Excel, Archer GRC
- **Knowledge Areas (Architecture & Cloud):** Okta, Saviynt, CyberArk PAM Concepts, One Identity, Oracle IAM (OIM), AWS IAM, PeopleSoft HRMS, ManageEngine

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) | Pune, India June 2019 – Present
Senior IAM Systems Engineer / IGA Lead

- Architect and optimize end-to-end Identity Lifecycle Management (JML) workflows, automating birthright provisioning, deprovisioning, and Just-In-Time (JIT) access within SLA baselines.
- Administer enterprise IGA platforms (SailPoint IdentityIQ and RSA Aveksa), managing Identity Cubes, attribute mapping, identity refresh tasks, correlation configurations, and full/delta aggregations.
- Design and enforce enterprise RBAC and ABAC policy frameworks across Active Directory and Microsoft Entra ID, eliminating toxic entitlement combinations and Segregation of Duties (SoD) conflicts.
- Direct target application onboarding lifecycles by evaluating endpoint schemas, defining attribute correlation rules, configuring provisioning policies, and integrating standard connectors (AD, LDAP, SCIM, Delimited/CSV).
- Manage periodic User Access Reviews (UAR) and access certification/recertification campaigns, maintaining compliance logs via Archer GRC to ensure audit readiness for SOX, SOC 2, and ITGC standards.

- Maintain directory services and access authentication across Active Directory (OUs, Security Groups, GPOs) and Microsoft Entra ID; configure SSO, SAML 2.0, and MFA (RSA SecurID) to improve access reliability.
- Engineer operational Power BI dashboards and data models tracking IAM operational KPIs, recertification burn-down velocity, dormant/orphan accounts, and entitlement creep to accelerate executive decision-making.
- Direct platform reliability and incident triage via ServiceNow, resolving tier-2/tier-3 identity synchronization bottlenecks, provisioning queue failures, and authentication outages to maintain 99%+ operational uptime.

Hinduja Global Solutions (HGS) | Pune, India August 2017 – March 2018
Quality Assurance & Client Operations Specialist

- Established structured QA evaluation frameworks across operational workflows, reducing procedural and provisioning errors by 15%.
- Conducted Root Cause Analysis (RCA) on escalated operational defects, driving targeted corrective actions (CAPA) and lifting client satisfaction (CSAT) ratings by 20%.
- Delivered compliance training on SLA targets, standard operating procedures (SOPs), and data integrity standards across front-line support staff.

Riddhi Corporate Services (RCSPL) | India September 2016 – July 2017
Operations & Business Process Associate

- Cleansed, normalized, and validated complex multi-source operational datasets, improving data consistency and accuracy by 25%.
- Automated operational KPI dashboards and executive reporting workbooks using Tableau and Advanced Excel, reducing recurring manual overhead by 30%.
- Conducted process bottleneck analysis on raw operational data to enhance resource utilization and workflow throughput.

CERTIFICATIONS & CREDENTIALS

- **SailPoint Identity Security Leader Credential** – SailPoint
- **ManageEngine Certified Expert: Identity Governance & Administration (IGA)** – ManageEngine
- **Non-Human Identity Management (NHIM) & Workload Identity Architecture** – Oasis Security
- **Saviynt Identity Security for the AI Age & AI Governance** – Industry Credentials

EDUCATION

Bachelor of Engineering (B.E.) in Electronics & Telecommunication (E&TC)
North Maharashtra University | First Class
